“HD Recorder”: Best for Long-term Recording

Long-term data recording is available on a standard built-in HD(40GB*1). Fast speed recording can be done at 1μs with 1 channel and at 10μs with 16 channels. Since data is digitally saved, post-record analysis or long-period management of data, which is not an option for recording paper, is possible.

Sample or peak style is selectable in recording. Peak style enables to have faster sampling data with max/min value than recording interval so that it can record data in slow recording interval.

*1 5GB is occupied by system.
